

Susan M. Longar, MD
Peter K. Martindale, OD

Refraction

A refraction is performed to determine a prescription for eyeglasses. Some medical insurances, including Medicare, will not pay for a refraction. If you have a vision insurance, such as Vision Service Plan (VSP) or Medical Eye Services (MES), this charge is usually covered. Our charge for this service is **\$45.00**. We will bill your insurance for this service, however, if they do not pay, you will be responsible for the cost.

- YES, I want a refraction.
- No, I do not want a refraction.
- Please check vision first.

Those patients who have VSP or MES, should be aware that if a **medical diagnosis** is found by the doctor, your medical insurance will also be billed for a portion of the exam. VSP and MES cannot be billed for a medical diagnosis, which means you co-payment may not be the only balance you will be billed for.
